SUMMARY

Full-Stack Software Engineer (B.Tech CSE '27) with production experience building AI-powered web applications using **React, Next.js, Node.js, TypeScript, and PostgreSQL**; shipped multiple full-stack projects integrating **LLM APIs, RAG pipelines, and background job automation**. **LeetCode Knight** — Top 5% globally, 700+ problems solved.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Socket.IO

Backend: Node.js, Express.js, REST APIs, WebSocket, JWT, Google OAuth 2.0, bcrypt

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma ORM, Drizzle, Cloudinary

AI / GenAI: RAG Pipelines, LLM APIs (OpenRouter, Gemini, OpenAI, Claude), Prompt Engineering

Tools & DevOps: Git, GitHub, Docker, Vercel, Postman, npm

PROJECTS

Zephyr | *TypeScript, Express.js, PostgreSQL, Prisma ORM, Inngest, OpenRouter, Stripe*

[GitHub](#) | [Live](#)

- Built an **AI website builder** using **React** and **Express**, converting prompts into functional websites with **live preview**, reducing build time by **50%**.
- Delivered **visual element editing** with inline click-to-edit controls, eliminating reprompting.
- Decoupled AI generation via **Inngest durable background jobs** with **OpenRouter** API gateway, improving success rate by **70%**.
- Designed an **immutable version control** with one-click rollback across AI-generated and manual snapshots.
- Automated **credit refunds** on generation failure and integrated **Stripe** for billing and payment processing.

StudyFlow | *React.js, Express.js, MongoDB, Gemini API, Cloudinary, OAuth*

[GitHub](#) | [Live](#)

- Architected an end-to-end **RAG pipeline** using Express.js and Gemini API; using **semantic chunking** and keyword-based retrieval to deliver context-aware mind maps, summaries, quizzes, and flashcards.
- Built responsive frontend with route-level **lazy loading and code splitting**, reducing initial load time by **40%**.
- Implemented **secure auth** via Google **OAuth** and **JWT** with Cloudinary for scalable document storage.
- Designed an **interactive AI chat** interface with document-grounded Q&A and real-time learning analytics dashboards.

Social AI | *Next.js, Shadcn/UI, TypeScript, PostgreSQL, Inngest, Insforge, Clerk*

[GitHub](#)

- Developed a **multi-channel social media scheduling platform** across **7 social platforms** using **Next.js**.
- Implemented timezone-aware automation with fault-tolerant retry logic, cutting failed attempts by **60%**.
- Secured multi-account connections via **OAuth + PKCE** with server-side encryption using **Insforge**.
- Designed a modular content pipeline with **calendar, Kanban, and list views** for backlog management.
- Integrated **LLM-powered AI ideation** via **Insforge AI models** with **Inngest durable jobs**, reducing ideation time by **80%**.

ACHIEVEMENTS

- **LeetCode Knight:** Ranked in the **Top 5% globally**; solved **600+** problems across various concepts of **Data Structures and Algorithms**.
- **GeeksforGeeks:** Solved **500+** problems; earned a **3-Star** rating with a contest rating of **1770+**.
- **Smart India Hackathon 2025:** Led a 6-member team to design and present a **full-stack AI automation MVP**, securing **1st place** among 50+ teams at the internal SIH round (Ministry of Power, Govt. of India).
- **DSA Mentorship:** Conducted mentoring sessions for **50+ junior developers** in C++ and Data Structures & Algorithms, improving problem-solving proficiency and contest readiness.

EDUCATION

Gandhi Engineering College

Bachelor of Technology in Computer Science Engineering; CGPA: 8.9/10.0

Bhubaneswar, Odisha

2023 – 2027
