SUMMARY

Full-Stack Software Engineer (B.Tech CSE '27) specializing in building and shipping scalable web applications using React, Node.js, TypeScript, and PostgreSQL, with hands-on experience integrating LLM APIs and RAG pipelines into production systems. **LeetCode Knight** — Top 5% globally, 600+ problems solved. Targeting Full-Stack / Software Engineer Internship roles for Summer–Fall 2026.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Socket.IO

Backend: Node.js, Express.js, REST APIs, WebSocket, JWT, Google OAuth 2.0, bcrypt

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma ORM, Drizzle, Cloudinary

AI / GenAI: RAG Pipelines, LLM APIs (OpenRouter, Gemini, OpenAI), Prompt Engineering

Tools & DevOps: Git, GitHub, Docker, Vercel, Postman, CI/CD, npm

PROJECTS

Zephyr | *TypeScript, Express.js, PostgreSQL, Prisma ORM, Inngest, OpenRouter, Stripe*

[GitHub](#) | [Live](#)

- Built an **AI website builder** using **React** and **Express** that converts natural language prompts into functional websites with **live preview and visual element editing**.
- Decoupled AI generation from the request cycle utilising **Inngest durable background jobs** with **OpenRouter** API gateway, improving success rate by **50%**.
- Designed an **immutable version control system** with one-click rollback across all AI-generated and manually saved snapshots.
- Automated **credit refunds** for generation failure and integrated **Stripe** for billing and payment processing.

StudyFlow | *React.js, Node.js, Express.js, MongoDB, Gemini API, Cloudinary, OAuth 2.0*

[GitHub](#) | [Live](#)

- Architected an end-to-end **RAG pipeline** using Express.js and Gemini API; leveraging **semantic chunking** and keyword-based retrieval to deliver context-aware mind maps, summaries, quizzes, and flashcards.
- Developed a responsive frontend using React and Tailwind with route-level **lazy loading and code splitting**; providing interactive AI chat, progress tracking dashboards, and real-time learning analytics.
- Implemented **secure authentication** with Google OAuth 2.0 and JWT; integrated Cloudinary for scalable document storage with deployment on Vercel.

ByteChat | *React.js, Node.js, Socket.IO, MongoDB, Zustand, Tailwind CSS*

[GitHub](#) | [Live](#)

- Built a **real-time full-stack chat application** with event-driven architecture using WebSocket (Socket.IO) for low-latency bidirectional communication; engineered for fault tolerance and high availability.
- Secured the **REST API layer** with JWT authentication, HTTP-only cookies, bcrypt password hashing, and role-based authorization middleware.
- Optimized **frontend performance** with Zustand global state management and React.memo memoization, achieving a 40% reduction in unnecessary re-renders across a fully mobile-responsive UI.

ACHIEVEMENTS

- **LeetCode Knight:** Ranked in the **Top 5% globally**; solved **600+** problems across various concepts of **Data Structures and Algorithms**.
- **GeeksforGeeks:** Solved **500+** problems; earned a **3-Star** rating with a contest rating of **1770+**.
- **Smart India Hackathon 2025:** Led a 6-member team to design and present a **full-stack AI automation MVP**, securing **1st place** among 50+ teams at the internal SIH round (Ministry of Power, Govt. of India).
- **DSA Mentorship:** Conducted mentoring sessions for **50+ junior developers** in C++ and Data Structures & Algorithms, improving problem-solving proficiency and contest readiness.

EDUCATION

Gandhi Engineering College

Bachelor of Technology in Computer Science Engineering; CGPA: 8.9/10.0

Bhubaneswar, Odisha

2023 – 2027
